

Distributed energy systems kingston

Distributed energy systems kingston

Kingston Hydro supports those who wish to generate electricity locally and sustainably. For its efforts to facilitate connection of cleaner, greener electricity generators to the local distribution system, Kingston Hydro received the 2009 Electricity Distributors Association "Award for Environmental Excellence".

If you are interested in connecting a generator to the Kingston Hydro distribution grid, please read the Appendix B: Guide for DER Applicants and the Distributed Energy Resources Connection Procedures documents carefully.

If you're a residential or small business customer, including residential or small business net metering customers, who pays Time-of-Use (TOU) electricity prices, you can choose to switch to Tiered or Ultra-Low Overnight (ULO) prices., visit our Electricity Rate Choice page for the online election form and more information on the price plan options.

We would like to acknowledge that this land is steeped in rich Indigenous history and the promise of an equally rich future. The people who provide oversight to Kingston Hydro Corporation are grateful to share in the stewardship of our region and we commit to delivering our services with care for the earth.

We recognize our shared history and future, as we strive to create an honest, open, and inclusive culture. Today, this region is still the home to many Indigenous Peoples who continue to care for the lands and the waters. We acknowledge our duty to the earth with gratitude and appreciation.
