

# Distribution management system smart grid

Distribution management system smart grid

The U.S. Department of Energy's Office of Electricity accelerates innovation and creates "next generation" technologies to modernize the electrical grid. With grid modernization and the clean energy transition continually progressing, we've developed resources, including podcasts, to keep you informed. Get advice, insights, and lessons learned from innovators of emerging technology and trends.

Despite the wide commercialization of DMS, recent research on the topic has remained vast and in-depth at various levels of such platforms. The research aims to incorporate functionalities that will improve the performance of DNs, enhance them with additional capabilities and optimize the operation and profit of all participating stakeholders.

To view archived articles, and issues, which deliver rich insight into the forces shaping the future of the smart grid. Older Bulletins (formerly eNewsletter) can be found [here](#). To download full issues, visit the publications section of the [IEEE Smart Grid Resource Center](#).
