

Dlight solar lanterns in accra ghana

Dlight solar lanterns in accra ghana

The housing around the sensitive LED diodes and the electrical circuits is designed to withstand both heavy splashes of water and dust and therefore fulfils the requirements of protection class IP65. The low weight of 8 kg makes it easy to install on the hot-dip galvanised lamppost.

Always align the solar module of the SLS50/25 towards the south and ensure that it is positioned as close as possible to the winter sun to maximise the energy yield. Clean the module regularly to maintain its efficiency. Dirty or covered solar modules generate less electricity.
