Doe alternative fuel stations

b Primary propane stations offer vehicle-specific fueling capabilities. Secondary propane stations have fuel available for use in vehicles but limited vehicle fueling services.

c Retail hydrogen stations accept payment at the point of sale. Non-retail hydrogen stations are only available to a certain subset of customers (e.g., require an access card, PIN, or training).

d Totals are the number of station locations for all fuel types combined. Individual stations count multiple times if the station offers more than one fuel type. For electric, the total includes charging ports rather than station locations. For hydrogen, the total includes all (retail and non-retail) stations. For propane, the total includes all (primary and secondary) stations.

N2 - The Alternative Fuels Data Center (AFDC) provides a wealth of information and data on alternative and renewable fuels, advanced vehicles, fuel-saving strategies, and emerging transportation technologies. The site features a number of interactive tools, calculators, and mapping applications to aid in the implementation of these fuels, vehicles, and strategies. The AFDC functions as a dynamic online hub, enabling thousands of stakeholders in the transportation system to interact with one another.

AB - The Alternative Fuels Data Center (AFDC) provides a wealth of information and data on alternative and renewable fuels, advanced vehicles, fuel-saving strategies, and emerging transportation technologies.
