Spend [amount] more to select one Gift from EcoFlow Camping Light, EcoFlow Electric Heating Blanket, EcoFlow Foldable Camping Chair(Limited to 50 pcs)and EcoFlow Flatbed Trolley(Limited to 20 pcs), to add to cart.

EcoFlow PowerStream Solar System is a balcony solar system with a portable power station that allows you to use solar energy day and night and reduce energy bills. EcoFlow Smart Plug and EcoFlow app enable real-time energy usage monitoring and optimization.

* Due to the variation in electrical regulations among European countries, we kindly suggest that you familiarize yourself with your local legal requirements and consult with qualified electrical professionals in your area before making a purchase. Please ensure that the product can be installed and used in accordance with the regulatory requirements of your country/region.

This system stores all excess energy in a portable power station during the daytime and gives it back to you whenever you need it. With up to 1039kWh feeding into your home per year, you can save a maximum sum of 415EUR. And your energy bill savings are 3.5 times as much as that from using other home solar systems without batteries.

The car charging port is the only way for these portable power stations to connect with the microinverter. Due to the limitation of the car charging port, these power stations are subject to an output limit of 100W.

Smart Plugs monitor appliances" energy consumption in real time, so the microinverter can allocate just the right amount of electricity to each appliance, and the surplus to a portable power station. During peak hours, it prioritises home use. And most of the energy gets stored in off-peak times.

We designed this Super Flat Cable to sweep away all barriers to an easy installation. With this cable, connect solar panels to the microinverter inside your home without drilling through a wall.

With an IP68 waterproof rating and a robust anti-corrosive aluminum frame, these solar panels are durable, long-lasting, and weatherproof. As for installation, adjustable Mount Brackets are ideal for boosting sunlight collection in these two spaces.

Plug-and-play, space-saving and tenant-friendly. This system moves with you to every stage of your life. It's also worth noting that the 100W Flexible Solar Panel in the Starter Kit comes with strong nylon cable ties for you to reinforce the fixture.

Designed for hassle-free wall mounting, the solar panels come with mounting feet to maximize the use of

Ecoflow powerstream micro inverter

vertical space. With all the required accessories packed in the box, there's no need for additional purchases, streamlining the process while saving you time and money.
