All articles published by MDPI are made immediately available worldwide under an open access license. No special permission is required to reuse all or part of the article published by MDPI, including figures and tables. For articles published under an open access Creative Common CC BY license, any part of the article may be reused without permission provided that the original article is clearly cited. For more information, please refer to <https://>

Feature papers represent the most advanced research with significant potential for high impact in the field. A Feature Paper should be a substantial original Article that involves several techniques or approaches, provides an outlook for future research directions and describes possible research applications.

Editor's Choice articles are based on recommendations by the scientific editors of MDPI journals from around the world. Editors select a small number of articles recently published in the journal that they believe will be particularly interesting to readers, or important in the respective research area. The aim is to provide a snapshot of some of the most exciting work published in the various research areas of the journal.

Welcome to our webpage dedicated to electric vehicle charging stations in Quito, Ecuador! As the capital city nestled high in the Andes mountains, Quito offers a unique blend of historical charm and modern innovation.

Electric vehicle charging infrastructure quito

With a growing number of electric vehicles on the roads, we are here to assist EV owners in finding convenient and reliable charging stations throughout the city. Explore our comprehensive guide and embark on your eco-friendly journey in Quito!

For details on charging costs at specific locations, click on the pin icon on the map. You'll find a cost field that shows pricing information reported by other charger users. In some instances, pricing details may be mentioned in the charger's description. Please note that pricing information may not be accessible for certain locations.

To identify Tesla-compatible charging stations, select a station pin on the map. Review the station details for information on available connectors; Tesla-compatible stations will typically list Tesla-specific connectors. Additionally, consider checking user reviews and comments for valuable insights.

The score assigned to a charging station reflects user experiences, rated on a scale of 1 to 10, with 10 being the best. Negative user feedback lowers a station's score, whereas positive feedback raises it. Scores remain unaffected by neutral comments or check-ins. For deeper insights into the score's basis, we encourage you to read comments for each location. You can access PlugScores via the Station Summary icon on the map.

Another interesting driving destination from Quito is the Cotopaxi National Park. This stunning natural reserve is home to the Cotopaxi volcano, one of the highest active volcanoes in the world. The park offers breathtaking views, hiking trails, and opportunities for wildlife spotting. Electric vehicles can comfortably navigate the well-maintained roads within the park, making it an ideal destination for a day trip from Quito. Exploring the Cotopaxi National Park in an electric vehicle allows visitors to enjoy the beauty of this unique landscape while minimizing their carbon footprint.
