

# Electric vehicle charging kuwait city

Electric vehicle charging kuwait city

The rise of electric vehicles Hundreds of miles on a single charge, no oil changes, lower maintenance costs, charging at your home and office, and the reduction in our greenhouse gasses and dependence on fossil fuels are all contributing factors to the increased popularity of electric vehicles. You will undoubtedly see a significant increase in electric vehicles on the road.

Level I & II (Residential) The longer the range, the longer the charge time. Depending on your EV's battery size and acceptance rate, Level II charging stations can recharge your vehicle 4 to 6 times faster than Level I stations.

Level II & III (Commercial) Open network, closed network, smart charging, level II and III fast charging. There are many types of commercial chargers available with many different functions depending on your property type. After a site assessment we'll outfit your property with the future in mind.
