

Electric vehicle infrastructure athens

Young Tae Kim is the Secretary-General of the International Transport Forum (ITF). He was re-elected for a second term by the transport ministers of ITF member countries at their Annual Summit on 19 May 2022. He took office in his first term as Secretary-General in August 2017.

ITF experts travel to Athens as a part of the EU-funded project "Recharge and Refuel: Clean, smart and fair urban mobility", implemented in collaboration with DG REFORM as well as the Greek ministries of Energy and Environment and of Infrastructure and Transport. During the mission, ITF representatives meet stakeholders in order to better understand current projects and challenges with the support of electric vehicle uptake and their charging infrastructure.

Fourteen electric vehicle charging stations have been installed at Athens International Airport by Public Power Corporation's e-charging infrastructure operator subsidiary company DEI Blue, PPC reported on Thursday.

In specific tech specs, one will find the following chargers at Athens International Airport's Short-Term Parking 1: five dual chargers at 22 kW AC each, one supercharger at 120 kW DC (or 2 x 60 kW DC), and one supercharger at 50 kW DC and 22 kW AC.

Fourteen electric vehicle charging stations have been installed at Athens International Airport by Public Power Corporation's e-charging infrastructure operator subsidiary company DEI Blue, PPC reported on last week.
