He called for partnerships with the private sector to invest in charging stations across the country, assembling and manufacturing, and maintenance and repair services for EVs to create jobs and stimulate economic growth.

The shift towards EVs, he said, represented a significant step in reducing the country's dependence on fossil fuels, combating climate change, and improving air quality in the cities.

He said one of the key policy objectives of the Ministry was geared towards the application of new and appropriate technologies and innovations to transport infrastructure and service delivery.

"We are confident that collaboration with industry players and stakeholders will be critical as we explore and roll out innovative initiatives that empower people, promote entrepreneurship, and safeguard the natural environment," he said.

He said that through innovative technologies, the Ministry had collaborated with the Motor Traffic and Transport Department of the Ghana Police Service to automate traffic law enforcement.

"We have also launched Transport Ghana with very unique features, including passenger manifests, pre-departure checks, vehicle tracking, electronic ticketing, and a roadsafety watch to ensure road safety," he said.
