The average electric rates in East Freetown, MA cost 34 ¢/kilowatt-hour (kWh), so that means that the average electricity customer in East Freetown, MA is ...

The new default program rate is 15.784 per kilowatt hour (kWh) from December 2023 through November 2025 (by comparison, the current Eversource rate for basic service for residential customers is 16.078 per (kWh).

That's 28% higher than the national average electric bill of \$2,796. The average electric rates in East Freetown, MA cost 34 ¢/kilowatt-hour (kWh), so that means that the average electricity customer in East Freetown, MA is using 889.00 kWh of electricity per month, and 10668 kWh over the course of the year.

Even if onsite solar doesn't make sense for you, you can still participate in the clean energy transition and save on your electric bills by subscribing to a community solar farm. Community solar programs in East Freetown, MA typically save you 5-15% in electricity costs over the course of the year. For the average electricity customer in East Freetown, MA, 10% annual savings would amount to \$358 in savings per year.

Monthly electric bills are a product of how much electricity you use per month and your electric rate. In East Freetown, MA, the average monthly electric bill for residential customers is \$298/month, which is calculated by multiplying the average monthly consumption by the average electric rate: 889.00 kWh * 34 ¢/kWh.

The easiest way to compare the cost of electricity from one region to another is to look at the electricity rate. Residential rates in the U.S. range from 6 ¢/kWh to 71 ¢/kWh depending upon where you live, what types of power plants provide your electricity, and when during the day or year you're consuming electricity.

The average residential electricity rate in East Freetown, MA is 34 ¢/kWh, which is 1% higher than the average electricity rate in Massachusetts of 33.26 ¢/kWh. The average residential electricity rate in East

Electricity rates freetown

Freetown, MA is 80% higher than the national average rate of 19 ¢/kWh.

Solar panel systems help you save money by reducing your monthly electric bills. Although a \$50 or \$100 electric bill might not seem like much when you pay it each month, those bills add up quickly over ten, twenty or even thirty years: if you pay \$100 per month in electricity now, you'll pay over \$100,000 on electricity over the next thirty years!

Installing solar allows you to reduce or even eliminate your electric bill: when you pay upfront for solar panels, you are effectively paying today for the electricity you'll use over the next 25 or even 30 years. Calculating your savings from investing in solar is as simple as subtracting the amount you pay for solar from what you would have paid for electricity otherwise.

We know electric bills add up over time, and going solar is a great way to save money while helping the environment. When you sign up on the EnergySage Marketplace, you'll be able to receive and compare solar quotes side-by-side from qualified solar installers in your area. We're here to help along the way - talk with one of our Energy Advisors to learn more about your unique quotes, any local solar incentives you may be eligible for, or any other questions about saving on electric bills with solar.
