

## Electricity safety muscat

This course addresses the Oman regulatory requirements for installing and working on an electrical system. This course is a prerequisite requirement from the DCRP for all electrical staff undertaking work on electrical systems in Oman.

Working with electrical systems has the highest level of risk and potential hazards in industrial applications. Electrical activities are allowed to perform only by authorised personnel as per the authority levels. Electrical assessment & authorisation has to be done by systematically assessing the knowledge, skills & behaviours of the candidates on live electrical systems by certified assessors.

This course addresses the Oman regulatory requirements for installing and working on electrical system. This course is a prerequisite requirement from the DCRP for all electrical staff undertaking work on electrical systems in Oman.

**Course Overview** In this course, the learner will demonstrate knowledge of potential hazards associated with electrical equipment in the workplace and how to minimize or eliminate those hazards. Upon completion of this learning event, the learner will demonstrate knowledge of potential hazards associated with electrical equipment in the workplace and how to minimize or eliminate those hazards.
