

Emergency solar battery storage

Emergency solar battery storage

Updated September 2024: Removed Rockpals SP003 (discontinued) and Patriot Power Generator 1800. Updated information on the Patriot Power Cell and Renogy 10W panel to reflect newer models.

One way you can have a backup plan as an American citizen is to invest in an emergency solar power setup. This provides a means for you to harvest the sun's power to generate at least some of your own electricity, giving energy in potentially perilous times.

But there are lots of options on the market, so how do you know what's worth getting? Lucky for you, we at Pew Pew Tactical fully analyzed the marketplace to bring you the best emergency solar power setups.

For this article, we focused on emergency power setups that offered great features and good value. Our staff has a range of experience in survivalism and prepping -- from hobby preppers to previous law enforcement with experience in search and rescue.

While having solar panels installed on the roof of your house or keeping a dedicated solar panel setup in your backyard is beneficial, that's not what we're interested in today.

This device charges two devices at once via its two USB ports and features an 8,000-milliamp-hour capacity. It also sports a rain-resistant design, a 2-year warranty, and a 100% satisfaction guarantee.
