

Energizer aaa batteries

Energizer aaa batteries

Features and Benefitso High capacity charge retention up to 1 yearo Can be charged more than 600 timeso Ideal for powering high drain devices such as digital cameras and R/C toys

I'm reviewing this product because I got a free sample from Ocado. I have bought Energizer batteries in the past and have had no complaints about their performance. So far, so good with this version.

Have used Energizer batteries (although not Max version) before and been pleased with them, so thought this was too good an opportunity to miss. Like that these have a 10 year shelf life and a promise of protection from leakage. Have just ordered more of AAA in addition to some AA as they are on special offer currently.

I'm reviewing this product because I got a free sample from Ocado. Have these in most of my remote controls and they seem to go on forever. Always been a good brand and these live up to expectations.

I often flit between high performance brands and this is most definitely one of them. This is dependent on which brand is on offer. I would recommend to all due to their staying power!

I was sent this pack of batteries free by Ocado to review. I was really pleased because I have been finding that cheap batteries are not worth buying as they do not last long and also seem to lose their power. Impressed by the 10 years life so it is worth getting a big pack. Have replaced some of my rechargeable batteries in products as they were no longer keeping their charge and products are working well. Will look at also buying the AA Energizer batteries.
