

Energizer rechargeable batteries

Energizer rechargeable batteries

The IKEA and Duracell batteries, both Japan-made, had the most capacity after a year in storage and the best battery health; (by testing internal resistance) after a year of continual use.

Project Farm found that rechargeable batteries made in Japan generally outperform China-made batteries by a noticeable margin; the top 7 best-performing batteries were made in Japan and the bottom 3 were all made in China.

So which battery brand is best for photographers? The Duracell and IKEA were the two best batteries across the three tests, so either one should do well for you. If you're cost-conscious, though, the Duracell batteries cost \$2.25 (or more) each while the IKEA batteries cost \$1.75 each.

Nordic Swan Ecolabel is the Nordic's most recognised environmental certification. A product that carries the Nordic Swan Ecolabel complies with product specific environmental, health and quality requirements in all relevant stages of the lifecycle - raw materials, production, usage, re-use and recycling. The requirements are designed to protect environment and health by focusing on biodiversity in forests, land and sea, restriction on hazardous substances, resource efficiency, circular economy and reduction of greenhouse gas emissions.

To calculate the overall star rating and percentage breakdown by star, we don't use a simple average. Instead, our system considers things like how recent a review is and if the reviewer bought the item on Amazon. It also analyses reviews to verify trustworthiness.
