Energy efficiency freetown

Most of the population in Sierra Leone cooks with firewood or charcoal. See how we are working with various partners including Ministry of Energy and GIZ to support development and construction of improved stoves that use less energy, emit fewer pollutants, reduce cooking time and are more durable through locally trained producers.

Abdul Fullah from SLSB supported the call for a national standard and establishing a national quality mark for cookstoves and expressed interest from SLSB to be involved in the process. Lamin Kamara from GIZ Endeavor welcomed the establishment of the CCDC and also provided details of testing of cookstove which was carried out with EnDev support.

Such a transition to a more efficient charcoal value chain will result in climate benefits in terms of greenhouse gas mitigation and maintaining the forest cover in the country.

About UNDP partners with people at all levels of society to help build nations that can withstand crisis, and drive and sustain the kind of growth that improves the quality of life for everyone. On the ground in some 170 countries and territories, we offer global perspective and local insight to help empower lives and build resilient nations.
