

Energy efficient solutions

Energy efficient solutions

Better Buildings is an initiative of the U.S. Department of Energy (DOE) designed to improve the lives of the American people by driving leadership in energy innovation. Through Better Buildings, DOE partners with leaders in the public and private sectors to make the nation's homes, commercial buildings, and industrial plants more energy-efficient by accelerating investment and sharing successful best practices.

Energy efficiency means using less energy to do the same jobs, which ultimately reduces your home's energy waste, and saves you money. To truly increase your energy efficiency, it'll take more than just using less energy - you'll need to be aware of how energy is used, where it's wasted, and how it can be used more effectively and efficiently in everyday life. Don't worry. It's a lot easier than it sounds.
