## Energy management bahamas

WMS Holdings Limited provide world-class solutions to give business the tools they need to become energy efficient. We combine cutting-edge software & hardware to give you one of the most effective energy management and monitoring systems available today.

WMS Holdings Limited are based in The Bahamas and are a passionate provider of cost-effective energy reviewing, monitoring and technology services. We are all about showing you how to minimize your energy problems by maximizing the use of energy reduction technologies and power of Big Data, AI and IoT.

We work with SME's, Facilities Managers, Property Managers, Utilities and Energy Brokers throughout The Bahamas and Caribbean to help them securely manage the energy; reducing energy wastage, increasing control and lowering company carbon footprints.

You're under increasing pressure to hit top-down energy reduction targets efficient Building Maintenance You need to get control of inefficient building maintenance schedules. Accurate Tenant Billing You need to accurately bill your tenants to avoid dispute and unfairness. Poor Data Visibility You have limited energy data and what you have is difficult to analyse interested in learning more? Check out our technologies right here

Alongside the hardware and software our clients need to monitor and manage energy consumption within their buildings, WMS Holdings Limited also provide specialist energy management consultancy.

We help our clients in The Bahamas and Caribbean find cost-saving opportunities that show up in our data reports. And for every new client, we follow a uniform set of standards (SMARRT):

Our leading product the Eniscope energy management system - is at the core of a nationwide project of energy monitoring and reduction for global convenience store giants 7-Eleven in Denmark, Europe.

This project is being managed by fellow Eniscope enthusiasts and energy consultancy IQ Energy Nordic. The project covers more than 120 stores across Denmark and provides an excellent example of the capability of our technologies to handle large roll-outs and multi-site project requirements.

The project has been so successful that Eniscope has been recommended internally to the other countries in the region. Proof of Concepts (PoC) are underway in Norway and Sweden at the time of writing.
