Energy storage economics georgetown

The Department of Economics inspires and educates our undergraduate, master's and Ph.D. students through high-quality instruction and a rigorous curriculum, preparing them to lead in economic research, policy, finance, business and law. Our engaged faculty conduct innovative theoretical and applied research, advancing economic knowledge. We are dedicated to creating an academic environment that sparks intellectual curiosity and fosters groundbreaking research, extending our commitment beyond the classroom to serve the profession and society.

The dedicated Department of Economics team at Georgetown University comprises full-time faculty, adjunct professors and staff committed to providing students with the instruction, guidance and administrative support needed throughout their academic journey. Whether through engaging discussions in the classroom or providing valuable resources, our team aims to empower students and help them thrive. We strive to create a collaborative environment that promotes learning, growth and success.

Demand for big data expertise continues to grow and employers want candidates who can excel in quantitative roles. Our program equips you with unique, marketable skills through comprehensive econometrics and data analysis courses, setting you apart in the field.

"In choosing an economics master's degree, the most important things I considered were content, credentials and connections--and Georgetown's program hit all three."
