## Energy storage grid investment

The investment team have constructed a diversified portfolio of operational utility-scale BESS projects. Each project can generate multiple revenue streams to allow GRID to deliver on its return objectives. GRID optimises its assets through allocating capacity across the available revenue sources, primarily by balancing between trading and frequency response based on market drivers.

John is a highly-experienced international executive in the energy sector and an investor and advisor in renewable energy and digital technology. In his early career, John worked in civil nuclear power generation and held a number of senior roles at BP, focusing on the North Sea and Azerbaijan. Latterly at BP, he held a range of corporate-level executive roles, including Group Chief Information Officer.

He was also responsible for group-wide physical and cyber security and led the development of corporate digital transformation investment activity. John is currently a senior advisor to global blue-chip consultants specialising in energy and digitisation, a partner with donedeal (Monaco) &#8211; a boutique financial advisory and M& A house &#8211; and is on the board of cyber security firm Global Integrity. John also serves on the Enterprise Committee of the Royal Academy of Engineering.
