

Ese group renewable energy grant

Ese group renewable energy grant

Funding is awarded through an open, competitive process hosted primarily on the EERE Funding Opportunity eXCHANGE. Project selections are merit-based with an emphasis on potential energy, environmental, and economic benefits.

Weatherization Assistance Program (WAP) Innovation grants include the Enhancement & Innovation (E& I) grant, Sustainable Energy Resources for Consumers (SERC) grant, and the Community Scale Pilot Program (CSPP). These grants are competitive funding opportunities that are available to WAP Grantees, Subgrantees, and non-profit organizations to demonstrate innovative technologies and approaches that go beyond the scope of the formula WAP. Innovation grants offer more flexibility than the WAP formula grants and unique opportunities to broaden the impact of WAP.

Applicants are encouraged to use awarded E& I funds in conjunction with Department of Energy WAP formula awards and other funding sources to deploy demonstration projects that have potential to be scaled nationally, enhance the benefits realized by underserved communities, and ensure an equitable transition to a clean-energy economy.

The WAP E& I competitive grants are not subject to the Average Cost Per Unit (ACPU) and Savings-to-Investment Ratio (SIR) requirements of the WAP formula program for weatherization jobs and renewable energy measures.
