

European sustainable energy awards

The European Sustainable Energy Awards recognise outstanding individuals, innovations and achievements in renewable energy and energy efficiency across Europe, promoting best practices and raising awareness of sustainable energy solutions and projects for advancing Europe's decarbonisation.

Apply now

Anyone in the EU can submit a recent project - from a local initiative to an industry-wide programme - or a profile of a person that is helping the citizens, industry or the public sector work towards achieving the EU Green Deal objectives.

Along with being considered best-in-class for their contribution to a sustainable energy future, winners and finalists receive added visibility for their work. A professional film crew visits the finalists to create a promotional video of their work, and their profiles are promoted on the EUSEW communication channels, as well as being included in a press package sent to pan-EU and local media outlets.

If you have any questions about the Awards, please feel free to contact the EUSEW Secretariat at [awardseusew \[dot\] eu](mailto:awardseusew@eusew.eu) ([awards\[at\]eusew\[dot\]eu](mailto:awards@eusew.eu)).

The European Sustainable Energy Awards (EUSEW Awards) recognise outstanding individuals and projects for their innovation and efforts in energy efficiency and renewables. Prizes will be awarded in three categories: Innovation, Local Energy Action, and Woman in Energy. Winners are announced during the EUSEW Awards Ceremony on 11 June 2024 in the presence of European Commissioner for Energy Kadri Simson and the high-level jury.

The winners will be decided by an online public vote, which is open now until 2 June.

The EUSEW Innovation Award recognises outstanding ongoing or recently completed EU-funded projects that show an original and innovative path towards the clean energy transition.

The EUSEW Woman in Energy Award recognises women who lead outstanding activities that, if replicated, help to advance the clean energy transition in Europe. Particular attention is placed on efforts to drive the gender mainstreaming agenda and support equality and equal opportunities in the energy sector.

The European Sustainable Energy Week (EUSEW), the biggest annual event dedicated to renewables and efficient energy use in Europe, takes place on 11-13 June under the theme "Net-zero energy solutions for a competitive Europe." The event will focus on delivering Europe's decarbonisation through green technologies and solutions towards a fair and just transition for people and competitive businesses.

European sustainable energy awards

Registrations for onsite attendance in Brussels and online participation are now open.
