The city of Minneapolis in Minnesota, États-Unis, has 289 public charging station ports (Level 2 and Level 3) within 15km. 93% of the ports are level 2 charging ports and 25% of the ports offer free charges for your electric car.

The EV Spot Network is a series of 70 renewably-powered curbside EV Spot Charging locations within Saint Paul and Minneapolis that offer public access to the new all-electric Evie carshare service and the EV spot electric charging stations.

American Lung Association works to reduce the impact of fuel and vehicle emissions on public health. As host of the Minnesota Clean Cities Coalition, part of the U.S. Department of Energy's Clean Cities program, the organization works to increase the use of electric vehicles and the availability of charging stations.

East Metro Strong is a public-private partnership of businesses, cities, and counties working together to bring more and better transit investment to the East Metro and catalyze job growth and economic development opportunities.

Xcel Energy provides energy to millions of homes and businesses across eight Western and Midwestern states. The company is leading the clean energy transition across all the ways it powers people's lives, from its vision to deliver 100% clean electricity by 2050 to reducing emissions from its natural gas service and making it more affordable and convenient to use electric transportation as it works toward powering 1.5 million EVs by 2030. Xcel Energy's annual Sustainability Report details its progress.
