

Eve lf280k grade a battery

Eve lf280k grade a battery

Manufacturer: EVE Model: V3 LF280K Size: 72mm x 200mm x 172.5mm Capacity: 280Ah Weight: 5.35KG Maximum Discharge: 280A (1C) Nominal Voltage: 3.2V Cycle Life : 8000 cycles @ 0.5C Top: EVE connector, bus bars and screws included. Protection: None

Safety First: While LiFePO₄ offers inherent safety advantages, these cells require proper handling and expertise to assemble a safe battery pack. It's crucial to understand and follow recommended safety precautions during assembly and use.

Battery Management System (BMS) Required: These cells are not equipped with protection circuits. A BMS is necessary to manage the charge and discharge cycles, ensuring safe and optimal performance of your battery pack.

Assembly Instructions: Assembling a LiFePO₄ battery pack requires a strong understanding of electronics and proper cell assembly techniques. EVE provides limited instructions, and incorrect assembly can lead to fire, explosion, or personal injury. It is crucial to possess the necessary knowledge and experience before attempting to assemble your own battery pack.

For your safety, we strongly recommend consulting with a qualified battery assembly professional or researching LiFePO₄ cell assembly best practices extensively before proceeding.
