

Fronius primo solar inverter

Fronius primo solar inverter

The transformer-less Fronius Primo-15.0 is the ideal compact single-phase 15.0 kW inverter for residential and small-scale commercial installations. In accordance with ESA rules for residential applications, the Fronius Primo can operate efficiently at a maximum input voltage of 600 V. And for increased efficiency and additional cost savings for commercial applications, the Fronius Primo can operate at the maximum input voltage of 1,000 Volt.

The Fronius Primo comes with power categories ranging from 3.8 kW up to 15.0 kW. The transformerless design features a compact, single-phase inverter that is ideal for residential and small-scale commercial applications. The Fronius Primo inverter features a wi-fi interface and pairs perfectly with the Fronius Rapid Shutdown Box

Fronius has an extensive line of solar inverters to power any size of the system; from a family home to a large scale commercial business. Power capabilities of Fronius inverters range from 1.5 to 24.0 kW. Fronius has three lines of inverters with varying power ranges of each inverter; Primo, Symo, and Symo Advanced. All of Fronius Inverters are Rapid Shutdown compliant.

Fronius has been a leader in energy conversion technology since 1944 and specifically solar electronics since 1992. They are a privately held, family-run business with the third generation of the family leading the company. In 1979, the founder's children took over the company, and since 2011, the founder's granddaughter leads the company. Today, Fronius is in 28 countries, represented by subsidiaries, and they have sales partners and representatives in over 60 countries. Fronius is headquartered in Austria, with the U.S. division based in Indiana.
