

German solar grant ghana

German solar grant ghana

As part of micro measures of technical cooperation projects by local carrier (the carrier itself is not) can be supported that have a social, humanitarian or charitable nature and be aimed at the poorest of the country. They may have no direct connection with ongoing projects of German development cooperation and must constitute a self-contained measures which do not result in recurring obligation.

Suitable projects can come from any sectors of poverty reduction, public health & sanitation improvement, income generation, basic education, vocational training, women empowerment, protection of the environment or else.

The maximum budget is EUR10,000. Implementation of the measure must be not later than by the end of September of each year with the presentation of a detailed final report completed (preferably with photos) within three months.
