

Ghana solar traffic light project

Ghana solar traffic light project

"When the traffic light run into trouble you have to go through the trouble to repair all the phases so I contacted my supervisors, Dr Reuben Tamakloe and Dr Michael Donkor and informed them of LEDs which give off all the three colours," he said.

"We are working in the Central Business District of Accra and the West, North-West, the East and North East of the district of the Accra Central District. We are putting up smart streetlights that are energy efficient. We are doing this in about seven assemblies (Ga East, Ga West, Ga North, Lekma, AMA, and a few others)."

"We've signed contracts with three contractors worth about 10 million dollars and we are working on about 14,000 streetlights luminaries and about 11,000 polls with some being dual bracketed. Our timelines are that we finish by the end of the year (2020) that's what we are looking at and then defects liability take off from there."
