

Givenergy 5kw hybrid inverter review

Givenergy 5kw hybrid inverter review

If you've got a Tesco Clubcard, check if you have any vouchers close to expiring, as ?18 million-worth are due to run out on Saturday 30 November. Don't want to spend your vouchers yet? We've got a trick to extend their validity.

Homeowners will have to wait even longer for major leasehold reform after the Government described the previous attempt at overhauling the sector as "flawed". Here's what you need to know.

NS& I will cut its Premium Bond prize-fund rate to 4% from 4.15% for the January 2025 draw and beyond. But this rate was already lagging behind interest rates on standard savings accounts - so if you're a bondholder, you may want to consider moving your cash to an interest-paying account.

NatWest is the latest major lender to reduce the amount of time its mortgage customers have to lock in a new rate ahead of their current deal ending, joining five other high street banks. The changes mean you've less time to insure yourself against rates rising before your existing mortgage comes to an end.

A charity has launched legal proceedings against the UK Government, aiming to reverse its decision to restrict Winter Fuel Payments to those on certain benefits. It's still very early days and there are no guarantees, but here's what you need to know.

GivEnergy design and manufacture their own inverters, batteries and state-of-the-art management system and monitoring platform which combine to offer an exceptional storage package. This 5.0kW hybrid unit will simultaneously handle PV power generation, along with battery charge and discharge. Wi-fi comes as standard and gives access to the powerful monitoring platform, along with remote, site-specific firmware upgrades and troubleshooting via web browser or app. EPS backup can provide 2.5kW during a powercut.

Full UK technical support is also on-hand, and every inverter purchase receives 1 hour installation support as standard. The in-house control logic allows for simultaneous switching between charge and discharge to minimise imported energy, whilst export limitation is also available.

GivEnergy hybrid systems provide backup power of up to 2.5kW to dedicated critical circuits, output depends on battery capacity. These circuits require an isolator or change over switch which is recommended to be rated to 20A or greater.

I was very pleased with all aspects of Solar Battery group. I had lots of help and advice. The 2 Electrical Fitters were excellent and very knowledgeable. I would certainly recommend this company for your Solar requirements.

Best prices and advice with this company. Lewis was great and handled my enquiry exceptionally well. I do

highly recommend them for their expertise. The installation were a fantastic two, sadly didn't get their names but did a tidy fantastic job!!

Good communication before and after I purchased an extra 6.5kW battery for my existing system. Battery arrived within the time stated. Friendly and knowledgeable installation team arrived on the same day and fitted battery without a hitch. Would definitely recommend.

We had so many sales companies calling us trying to sell us an overpriced battery, I was on the verge of giving up when we found Solar Battery Group on Google. They show the prices for every system online, so you don't need a sales rep trying to give you the hard sell. Very helpful staff and we are very happy with the installation!
