

Grants for ngos solar panels ghana

Grants for ngos solar panels ghana

600 million people in Africa live without access to electricity. When the sun goes down, businesses close, streets grow dark, and homes are lit with dirty, dangerous, and expensive kerosene lamps, which are responsible for high rates of childhood burns, respiratory infections, poisonings, and house fires. Let There Be Light International wants to change that.

More distributed solar means less dirty, dangerous, and expensive kerosene in off-grid homes and less pollution in our shared ecosystem. Renewable energy supports improved health, safety, and wellbeing, which enhances economic stability and reduces carbon emissions. Solar is a win-win as we work to combat Climate Change and Energy Poverty!

Your donation helps bring light to communities in need. Donate today and help LTBLI further the global Sustainable Development Goal #8211; making the world a brighter place for us all.
