

Group 24 battery box dimensions

Group 24 battery box dimensions

A battery box for extreme conditions. Structurally enhanced battery storage solution that maintains its tough impact properties down to -20 degrees Fahrenheit without worry of cracking.

Engineered to last the rigors of the outdoors. Made with UV inhibitors and color stabilizers to prevent structural degradation and color fading. Together, it's one of the toughest, most dependable battery boxes ever.

Designed for full-flow ventilation and collection of spilled electrolyte fluid. The secure ventilated cover incorporates multiple exit points for battery fumes and the acid-resistant reservoir safely captures spilled battery acid.

The external battery box dimensions help you determine the proper fit on your boat, camper, motorhome, trailer, car or caravan, as well as, lawn and garden and generator equipment.
