

Halfords ev charging installation

Halfords ev charging installation

Klarna's Pay in 3 / Pay in 30 days are unregulated credit agreements. Borrowing more than you can afford or paying late may negatively impact your financial status and ability to obtain credit. 18+, UK residents only. Subject to status. Ts& Cs and late fees apply.

Halfords has teamed up with Cord, an EV charger installer, to offer a home charging package. They provide a very fast installation, integrated service and flexible payment options and Cord's chargers are designed to be compatible with all EVs and hybrids.

Both models are equipped with 7.4kW fast charging, which is the maximum charging rate for most homes without a 3 phase electricity supply. This level charger will fully charge your EV overnight.

Cord's smart safety features include dynamic load balancing, which monitors the demand on your home's power supply and adjusts the charger's output to ensure safe and efficient operation. This technology helps protect your home's electrical systems and prevents overloads, even when other appliances are running simultaneously.

Currently, there are no special offers available for Cord chargers through Halfords. However, customers can still save money by using the OZEV grant, which can provide up to ?350 off the cost of a home EV charger installation. This grant is available to those who own or rent flats or rental properties and have access to off-street parking.

After an electrifying EV servicing success across their UK garages, Halfords is revving up support for those embracing electric motoring with a new partnership with Cord, the premier home charging installation provider. Now, customers can effortlessly book Cord's user-friendly home charging installation solution directly on the Halfords website.

Halfords opted for the Cord partnership due to its innovative and streamlined approach, making the often intricate and frustrating process of acquiring and installing the ideal home EV-charging solution a breeze.
