

Hanoi off-grid energy storage

Hanoi off-grid energy storage

Although BESS technology initially faces cost challenges, rapid global market expansion and advancements in battery technology are progressively making it more viable. Vietnam has acknowledged the potential of BESS and has articulated plans for its extensive integration into the national grid. Simultaneously, efforts are underway to foster domestic manufacturing capabilities, attract investments, and explore optimal technological solutions.

Beyond grid stabilization, BESS plays a pivotal role in advancing Vietnam's energy transition objectives. By effectively managing energy supply and demand, BESS contributes significantly to achieving targets for renewable energy adoption and diminishing reliance on fossil fuels. Furthermore, this technology catalyzes innovation, drives economic growth, and creates new avenues for employment within the clean energy sector. In essence, Vietnam is revolutionizing its energy landscape through BESS, aiming for a smarter, sustainable, and secure energy future.

With a profound legacy of 61 years in the electricity sector, PC1 Group takes pride in pioneering BESS research and implementation in Vietnam. Our integrated solutions combining rooftop solar panels and storage batteries are geared towards forging a resilient and sustainable green energy future. We are confident that with our extensive expertise and unwavering commitment, PC1 will make substantial contributions to advancing renewable energy development in Vietnam.
