

# High speed air carving tools

## High speed air carving tools

The Turbo Carver is a high speed power carver driven by air. It is incredibly smooth and as easy to use as a pencil. This amazing tool gives you the power to create beautifully detailed engravings and relief carvings in Wood, Glass, Metals, Eggs, Antler, Gems, Models or practically any material.

The Turbo Carver system, unlike other high speed carvers, already includes an inline foot control, air filter and air gauge. Right out of the box it is ready to easily connect right up to your compressor. This great tool is light, durable, easy to use and economically priced. Also Industrial Applications for the Turbo Carver High Speed Tool

Vortex F5 Carver is an Ultra High Speed Precision Carver 500,000 RPM! There is undoubtedly no other carver like it! World's Fastest Precision Carver! Exclusively designed for carving! Order this tool today to start carving better tomorrow.

"I have been carving for nearly 60 years, 40+ years of that with pneumatic high speed carving tools. Tooling with my hands for so many years on bronzes, I developed Carpal Tunnel Syndrome. To prevent my hands from going numb, I needed a solution fast. This led me to invest in all vibrationless pneumatic tools. I soon discovered they were all repurposed dental lab tools. After using these tools for over 20 years, I never found all of the right qualities in one tool, so I made my own perfect carver called the Vortex." - Debbi Lermond

The new Vortex F5 has been a long time in the making but it will probably be the last carver you ever buy! We have designed it to last and give artists and carvers many years of carving pleasure!

Here's how you can do it. First, you need to get away from carvers with electric motors and switch to a carver powered by air. Switching to air gives you 10 to 20 times the RPM over electric motor carvers. Second, use precision burs and cutters designed for ultra high speed; we're talking 400,000 to 500,000 RPM! Now you know what's needed, you'll want a tool designed for carving. The Vortex F5 ultra high speed precision detail carver is the tool for you. How so? What about the other tools on the market? Why is the Vortex the best tool to get?
