Using technology in a busy classroom isn't always as easy as it should be. The ClassVR interface and teacher portal provide the simple-to-use tools needed to ensure this exciting and engaging technology can deliver a rich, reliable experience for you and your students.

Our "50 Creative Ways to Use ClassVR" provides practical and inspiring lesson ideas directly from our customers. Learn how students of all ages have explored a wide range of content in line with the curriculum, find out how teachers have used VR as part of their smart classrooms and how you could spark learning opportunities in your school's classroom setting!

"Students used ClassVR to explore lines and angles in the VR world. They were 100% engaged during the entire lesson and loved using ClassVR headsets to enhance their learning experiences. The verbal communication and collaboration that took place throughout the lesson was incredible!"

"With ClassVR, I was able to provide an immersive experience of the Earth and Moon, which helped the students to experience and understand the astronauts' feelings. ClassVR's incredible controls make it possible to conduct lessons and make the class more enriching."

"Students were excited to be given building challenges in Minecraft as game-based learning. They took a further pride and ownership of their creations when they were able to bring their work from the digital world into their physical environment and manipulate it using ClassVR."

The Eduverse360 library opens the door to hundreds of thousands of 360° images and videos from across the globe. Experience the seven wonders of the world, from The Great Wall of China to The Colosseum, all without leaving your classroom.

With Eduverse360 and ClassVR, taking students on a virtual field trip is easier than ever. Travel to distant places with your entire class without needing permission slips or worrying about financial costs. VR is a powerful tool for building students' cultural capital.
