

Hybrid solar inverter 10kw

Hybrid solar inverter 10kw

Voltasol, the hybrid 10kW solar inverter developed by Voltacon, ensures that the solar power you produce is used in the best possible way. The inverter can cover an especially large portion of your energy needs and enable you to have greater independence from escalating energy costs. The higher your self-consumption is, the lower your electricity bill will be.

The hybrid inverter comes as a single- and three-phase system that can be used in parallel mode, forming large three-phase power supplies. The product includes a 1-year warranty which is extendable to 3 and 5 years.

If you are unhappy in any way with your purchase, you can return it for a refund or a replacement, as long as you return it in the same condition as it arrived (original/undamaged packaging and product) and within 30 days of receiving it. We will pay for your return postage on a faulty item as long as you send it using Royal Mail 2nd class recorded delivery (for EU or International Shipments, you have to use our UPS account, we will provide you with a return label)

IMPORTANT: We need to be able to identify an item with your order. We can only do this if you follow our returns process. Please do not send us items back that do not follow this process as they cannot be identified properly and will not be replaced or refunded.
