

# Is there an available market for solar in ghana

Is there an available market for solar in ghana

The growth of solar energy is being accelerated by public-private partnerships, according to the Ghanaian government. The deployment of solar projects, particularly in rural and underserved areas, has been helped by collaborations between government agencies, development organizations, and private sector firms. These collaborations have made it possible to install mini-grids and independent solar systems, providing communities with limited or no access to electricity in the past. In addition to enhancing livelihoods, this inclusive strategy promotes social and economic advancement.

Furthermore, the need for clean and sustainable energy sources in Ghana has increased due to the growing awareness of climate change and the need to minimize greenhouse gas emissions. In line with the nation's commitment to worldwide efforts to mitigate climate change, solar power provides a clean and environmentally sustainable option. The addition of solar energy to Ghana's energy mix helps the country's efforts to fight climate change, improve air quality, and advance sustainable development.

Switch to us and have all the power you use matched back to 100% renewable electricity from our community of over 2,500 independent generators. Including smart EV tariffs, for lower cost charging.

Good Energy's latest rating from Citizen's Advice is 2.9 out of 5 stars. This rating is worked out across three different categories, including contact waiting times(3\*), complaints (2\*) and customer commitments (3\*).

On this page you can see the rates of our current and historic tariffs. If you're looking for information about the features of the different tariffs that we offer, including the difference between fixed and standard variable tariffs, view our energy tariff explainer.

It takes a lot of work to genuinely support renewable energy. From buying power directly from independent generators, to working hard to match our supply with what our customers are using.

We price our tariffs at a level that enables us to keep doing this work sustainably, long term. When you're on a Good Energy tariff, you can trust that you're supporting green heroes who are making a difference - like Jo and Bev from Tongue Gill Hydro in Cumbria.

You can find details of all our tariff rates below. We'll always let you know if our prices are changing and explain why this is happening. Thank you for standing up for our planet and helping tackle the climate crisis.
