

Kosovo energy storage for resilience

Written by Donika Marku, the policy paper "Developing a resilient critical energy infrastructure in Kosovo" outlines the essential findings and provides concrete recommendations to help the Kosovo Government develop its critical energy infrastructure resilience while serving as an example for other developing states aiming to achieve critical infrastructure resilience. Furthermore, this policy paper stands the first of its kind to operationalize resilience to the critical infrastructure in Kosovo.

Time: 16:50 - 17:10 Date: 24 September 2024 Synopsis Following the announcement in 2022 that Kosovo was going to begin building its first battery energy storage systems (170MW/340MWh), this will provide relief to the energy crisis by stabilising the fluctuating frequency of electricity and help integrate other renewable assets onto the grid. With the grant for this project provided by the Millenium Challenge Corporation, a US Foreign Aid agency, hear from them as they showcase how Kosovo is preparing for future deployment of BESS systems.

Current+Current? is the leading source of news, insight and opinion as the energy transition accelerates. Current? engages with its readers on a daily basis. News stories, insightful blogs, in-depth analysis and carefully selected guest content are uploaded each day, and our Daily Snapshot emails inform more than 14,700 industry professionals every morning. Since its launch in May 2018, traffic has more than trebled as Current? has found its footing within the energy transition, and we have sizeable plans for its growth moving forward.
