

# Lithium battery charger 12v

## Lithium battery charger 12v

Alligator clips for ease of use. Clip black to your black terminal. Red to your red terminal. Do not short circuit. Red light on the charger will turn on when charging. Light turns green when the battery is full.

Charger will restart or "wake up" a Dakota Lithium BMS that has turned off a battery due to short circuit or excessive amp draw. Simply connect the charger to the battery to initiate a restart.

The amp rating is how much energy goes into your battery in 1 hr. For example, a 10 amp charger will charge a 54 amp hour battery in 5.4 hours. An appropriate sized charger should be 1/3 or less the amp rating of your battery. For example, a 3 amp charger is perfect for a 10 amp hour (Ah) battery.

Our Lithium LiFePO<sub>4</sub> batteries bring you revolutionary technology ahead of its time. As the creators of the Ionic brand, we combine powerful lithium, Grade A battery cells, and Bluetooth monitoring for a battery that lasts longer, works harder and plays smarter. With LithiumHub, you're guaranteed 100% US-based support, plus a competitive, no-nonsense 11-year warranty. Explore our collection today to experience the latest in marine battery technology.

Need some help determining exactly which batteries you need for your bass boat, RV, scooter, or other application? Let our lithium battery experts help you find the right battery.
