

Lithium ion battery storage containers

Lithium ion battery storage containers

As the international leader in manufacturing packaging for dangerous and high-value goods, we create complex, yet efficient and effective solutions in the transportation of lithium-ion batteries.

Our thermal shipping boxes are engineered to contain everything from minimally volatile applications to the most volatile thermal event. This way, you know that safety will always be on your side.

At Americase, we are responsible for the handling of over 70% of the nation's lithium-ion battery recalls. The Battery Bag is the lowest cost solution available on the market for the shipment of DDR lithium-ion batteries.

We understand the vulnerabilities and risks associated with lithium batteries. We rely on our extensive regulatory expertise and full in-house testing capabilities to craft innovative lithium battery storage containers that not only comply with all current and known future requirements but also incorporate the advanced features that make Americase products stand out.

From our Battery Bag designed for batteries under 1500-watt hours only and Battery Box for batteries up to 36 kg and below 1500- watt hours, to Battery Super Box engineered for batteries up to 399.9 kg and below 5600-watt hours and our large format lithium battery storage containers used by data centers for their battery backup units (BBU) and EV battery cases, our customers trust Americase lithium battery cases to keep their batteries safe in transit and in storage.
