

Lithium-ion battery technology cook islands

Lithium-ion battery technology cook islands

The Cook Islands Government invites expressions of interest from an experienced candidate to lead the design process for the battery replacement project in the Northern Group Islands of Pukapuka, Nassau, Rakahanga, Manihiki, Penrhyn, and Palmerston.

The project aims to transition from outdated lead-acid battery systems to more durable, reliable, and advanced lithium-ion battery technology to ensure energy security for the Northern Group Island communities.

The successful candidate will work closely with the Cook Islands Ministry of Finance and Economic Management (MFEM) and other stakeholders to deliver high-quality design specifications and plans that can be used for tendering the supply and installation of the project.

Prospective respondents should register their interest to participate in this EOI process by registering on the Cook Island Government E-Government Procurement Portal: <https://in-tendhost.uk/adbprocurementnetwork/asp/Home> and downloading the relevant EOI documents.

Submissions close at 4:00pm (CI Time) Tuesday 2nd May 2023 and must be submitted as per the requirements of the EOI via electronic submission to the above mentioned portal before the deadline.
