Loop earplugs where to buy

Prepare for your most restful sleep with Loop Dream earplugs. Experience powerful noise reduction and uninterrupted nights, whether you're side-sleeping, drowning out a snoring partner - or both.

Loop Dream is our first earplug specifically designed for sleep. With every feature created for maximum sleep comfort, these earplugs offer our most powerful noise reduction and all-night security - even when side sleeping.

Loop Dream is designed specifically for maximum sleep comfort. Made from our softest silicone, the earplug features a thinner nozzle to reduce pressure inside the ear canal, along with a smaller diameter and closed loop to ease pressure on the outer ear - perfect for side sleepers. The oval-shaped Loop Dream Ear Tips are designed to follow the natural shape of your ear, further reducing pressure for an even more comfortable fit.

The hybrid of memory foam and silicone ear tips creates the perfect blend for restful sleep. The foam forms a secure seal for maximum noise reduction (27 dB SNR) and stays comfortably in place all night. The silicone adds durability while providing a soft and comfortable feel in the ear.

However, if a good night's sleep is your priority, Loop Dream is designed specifically for that. It features our softest silicone earplug body and oval tips that naturally fit the shape of your ear, reducing pressure for a better night's sleep. With our highest level of noise reduction at 27 dB (SNR), the new hybrid foam-silicone Loop Dream Ear Tips effectively drown out unwanted nighttime noise.

If you already have Loop Quiet 2, you're covered for focus, travel and naps on the go. However, Loop Dream is the better choice if you're looking for earplugs specifically designed for sleep. It's tailored for maximum sleep comfort, offering maximum noise reduction and a secure fit for all-night comfort, even when side sleeping. So, if restful sleep is your priority, Loop Dream is worth considering.
