To calculate the overall star rating and percentage breakdown by star, we don't use a simple average. Instead, our system considers things like how recent a review is and if the reviewer bought the item on Amazon. It also analyzed reviews to verify trustworthiness.

Panasonic Lithium Coin batteries are low self-discharge and reliable. The lithium component in the battery provides high voltage output. This makes Panasonic Lithium batteries a match for high-energy consuming devices. They are ideal for gadgets and devices like wrist watch, LED light, neck light, electronic thermometer, desktop clock, calculator, electronic organizers, electronic toys and keyless entry.

It has 0% mercury added which makes it environment friendly and safe. The Panasonic Lithium coin battery is not only a good for your devices, gadgets and gizmos but is also good for the environment!

Panasonic Lithium Coin batteries are made of the highest quality materials and world class technology. The lithium and manganese dioxide combination gives stable output and low self-discharge rate. The lithium component further improves the voltage output, providing more power with an output of 3V.
