

Manufacturing energy storage maseru

Manufacturing energy storage maseru

Lesotho is ACE's home market. We have been operating there since 2014. Our headquarters in Lesotho are located in the capital city of Maseru, though we are operating in four other locations across Lesotho. Maseru is also the location of our flagship factory where we have been manufacturing the ACE One since 2014.

Uganda is the most recent market in which ACE has begun operating. We are headquartered in the city of Mbale in Eastern Uganda where we began operating in 2017. In 2019, we opened our second branch in Uganda in Gulu in the north. We plan to begin manufacturing in Uganda in 2021.

ACE has been operating in Cambodia since 2016. Our headquarters in Cambodia is located in the town of Siem Reap in the north of the country. We also have operations set up in the capital city, Phnom Penh. At the beginning of 2020, we set up our second worldwide factory in Siem Reap in order to expand our distribution in South East Asia.
