Mauritius energy storage regulations

Battery Storage: Mauritius aims to increase the share of renewable energy sources in its energy mix, which leads to fluctuating power injection. The installation of Battery Energy Storage Systems (BESS) is required to reduce fluctuation from variable renewable energy sources.

energy security. The Government of Mauritius has committed not only to abate GHG emissions by 40% by 2030 but more importantly to pursue its green energy transition and develop a more resilient national electricity sector that is grounded in a richer mix of.

The Central Electricity Board (CEB) is a parastatal body wholly owned by the Government of Mauritius and operating under the aegis of the Ministry of Energy and Public Utilities.

The design of the label shall be similar to the design of the label for Type 1 - Label for household refrigerating appliances classified in energy efficiency classes A+++ to C (except for wine storage appliances), except that, in paragraph (d), item (8) shall be replaced by the following item -.
