

Mauritius microgrid applications

Through a first procurement exercise, the archipelago's authority hopes to contract electricity under a long-term power purchase agreement (PPA) from 100MW of solar-plus-storage capacity. No figure was given for the storage capacity expected from the tendered projects.

The government of Mauritius is planning to increase the use of renewable sources of energy from the current level of around 22%, to 35% by 2025. The Indian Ocean island state has also been supporting distributed solar through net metering and rebates.

Your personal data will only be disclosed or otherwise transmitted to third parties for the purposes of spam filtering or if this is necessary for technical maintenance of the website. Any other transfer to third parties will not take place unless this is justified on the basis of applicable data protection regulations or if pv magazine is legally obliged to do so.

You may revoke this consent at any time with effect for the future, in which case your personal data will be deleted immediately. Otherwise, your data will be deleted if pv magazine has processed your request or the purpose of data storage is fulfilled.
