## Micronesia home energy storage

The contractor selected will sign an agreement with the utility, which is administering the tender, to supply equipment for two BESS-backed solar minigrids on the island. The solar arrays will have a combined generation capacity of 79 kW - small in global terms but enough to have a significant impact on a 100 km<sup>2</sup> island with a population of less than 11,400, at the last count.

Bidders are requested to submit details of their technical and financial offers in compliance with technical specifications laid out in the tender document, as well as statements of warranty for the PV equipment. Bids must be received by post by Jan. 28, 2025.

The chosen contractor will sign an agreement with the utility company, which is administering the tender, to supply equipment covering two solar minigrid projects on the island. The minigrid systems will have a combined capacity of 79 kW.

Interested bidders are requested to submit details of their technical and financial offers in compliance with the technical specifications in the tender document, alongside statements of warranties for the prospective PV equipment. Bids must be received via post by Jan. 28, 2025.
