

The unveiling of Tesla's model 3 as an affordably priced middle-class electric vehicle (EV) is heralding a dawn of a new era. In recent weeks, both France and the UK have committed to phasing out petrol cars fully for new car purchases by 2040. Moreover, a study from Cambridge Econometrics and partners on oil market futures estimated that climate action, like better improved fuel efficiency standards and measures to facilitate the spread of EV's, may reduce oil demand by around 11 million barrels per day (mbpd) in 2030 and by 60 mbpd in 2050.

With the world population expected to grow to 10 billion people by 2050, the demand for food and protein is expected to increase significantly. A new generation of chefs, farmers, sustainable eaters and adventure eaters is embracing entomophagy.
