

Octopus energy compatible battery

Octopus energy compatible battery

If you're looking for quick wins, smart thermostats like tado? are packed with features like individual room control and open window detection that can save you cash and reduce your carbon footprint.

All you have to do is charge up your battery when energy is cheapest and greenest. Then later on, when energy is in high demand (and so dirtier and more expensive), you can run on the cheap, green energy you've saved up instead.

Charging at home is easy, convenient and hassle free. And there are loads of smart chargers that work with our smart tariffs, meaning you can take advantage of the cheapest and greenest times to charge your car. Find out more over on our blog.

Voltaware's smart device can tell you which appliances you're spending most on. What's more, when you link it up to one of our Octopus smart tariffs, it'll tell you exactly when they cost the most to run, so you can make even smarter energy decisions.

Octopus Watch helps you make the most of Agile Octopus" half-hourly pricing. Raise your Apple Watch for the current rateTrack future rates and savings on your wristTurn the digital crown for the cheapest slot to run appliances
