

Off-grid energy storage bissau

Off-grid energy storage bissau

Pixii's BESS provides a fully integrated solution that seamlessly distributes power from solar PV panels, AC/DC coupling, and other energy sources, storing excess energy for later use. It ensures reliable power supply while optimizing cost savings through peak shaving and load management.

Beyond these savings, Pixii's system enables participation in grid services like frequency regulation and voltage support, allowing you to generate revenue. With remote monitoring and predictive maintenance, you can maximize efficiency and return on investment, making your system future-ready and cost-effective.

Pixii AS is committed to protecting and respecting your privacy, and we'll only use your personal information to administer your account and to provide the products and services you requested from us. From time to time, we would like to contact you about our products and services, as well as other content that may be of interest to you. If you consent to us contacting you for this purpose, please tick below to say how you would like us to contact you:

I agree to allow Pixii AS to store and process my personal data. [*Read More](#)
