

## Ovo energy tariffs table 2022

Can anyone remember what the fixed rate tariffs for electricity, both standard and Economy 7 were in February 2021? There doesn't seem to be an archive with this information.

The rates vary by region and by specific type of contract, so you'd really need an archive document to find the information you're looking for. If it helps, these were my E7 rates in February 2021:

If you haven't already done so, I'd suggest you make a note of your meter readings over the disputed period in as much detail as you can. If the meter has been lumping all consumption into one register, you'll have some serious number-crunching ahead to establish how it's split between peak and off-peak periods. It will be a tedious exercise, but possibly well worth it. I'll be happy to lend a hand to help you find the data you need.
