

Pakistan energy storage regulations

The current regulatory landscape for energy storage in Pakistan is limited. A significant trade barrier exists in the form of a 100% cash margin requirement on lithium-ion and lead-acid batteries, making it more challenging for businesses to invest in these technologies.

NEECA organized a national-level consultation on "Energy Efficiency and Conservation Action Plan 2023-30, Energy Conservation Building Codes (ECBC)- 2023 and Pakistan Energy Labels Regulations" on 21st July 2023, in Islamabad.

3.2.1. Energy security, including uninterrupted availability of energy sources, is an essential goal for the power sector. The Government shall endeavor to diversify the fuel mix of the generation capacity in the country, through optimal utilization of energy resources, such as hydro, renewable sources, coal, natural gas and nuclear. 3.3.

NEPRA"s main functions include the issuance of licences for undertaking specified regulated activities (ie, generation, transmission, distribution, supply business, and the determination of tariffs for the sale of electric power).
